

## Customer name

## Company Profile

Based in Reading and formed in 2020, Husp provides payroll services for contractors primarily active in the finance and banking sectors. FCSA accredited and part of the Huntswood Group of Companies which operates as a recruitment outsourcer, Husp was originally created to give contractors the option of a one-stop service that included both their placements and their payroll. With this in mind, it was imperative that their chosen software platform was able to be aligned across the group to support Husp's desire to deliver a cost-effective, efficient and affordable solution to their workers.

Husp duly implemented My Digital to run their payroll, CRM and finance functions which has given them a platform by which to grow their contractor volumes.

We learnt a lot on the guidance given by John, Katie & Dan at the beginning who spent a lot of time on Team calls and training our staff. It was a joined-up process which is vital as we work in a very regulated and formal industry where due diligence is paramount. Throughout the selection process, we met with many software providers and involved all our teams including technology, legal and HR to draw up a checklist of our requirements. It soon became clear that My Digital was my preferred option as I wanted the support of a company with real payroll and legislation expertise. This was important as my team can just pick up the phone if anything changes.
