## Company Profile

C9 Technology & C9 Recruitment are headquartered in London, UK. Originally established in 2008, we were inspired by the latest technologies in the cloud infrastructure sector. This has eventually evolved into many divisions, such as payroll, recruitment, migrations, telephony, and various other lines of business.

We have been a client of My Digital since January, it was one of the best decisions I have ever made for the business.

The level of service they provide is second to none, the platform is very powerful, and every staff member is an extremely driven individual.

They are extremely agile, a few months back I couldn't use a part of their platform due to our bespoke client base requirement, I mentioned an idea that would work if it was available. After meeting up last week, it turns out they took that idea and started developing it. On top of that, I found out yesterday they have an API, now the fun begins! We are surprised with new things every week.

Although, what I was not surprised to see was them winning Best Payroll Software at the Contracting Awards two years in a row!

Thanks for all the help and support you've given to our business so far in 2023.

If anyone is interested in jumping on board an incredible platform, please feel free to reach out to me for a genuine review!
